

Abstract in English

The aim of this bachelor thesis is to try to create a typology of Czech counterparts of Italian agent nouns with the suffix *-tore*. The thesis primarily focuses on the deviations from the lexical meaning of the individual expressions. Before dealing with the analysis on Italian agent nouns, it is necessary to describe the Italian suffix *-tore* and the most significant suffixes which are used for derivation of agent nouns in the Czech language. The practical part is concerned with the description of the individual Czech equivalents of Italian agent nouns and the commentary of those counterparts, based on the parallel corpus InterCorp. In conclusion, the thesis evaluates the results of the research and comments on them.
