

## **ANNOTATION:**

The bachelor thesis deals with the issue of field hockey in preschool age. It is divided into theoretical and practical part. The theoretical part deals with the issue of right preparation of field hockey players during preschool age. It also deals with areas that should be emphasised by the couch. It also focuses on history, rules and equipment necessary for field hockey. The practical part consists of questionnaire investigation focused on couches of preschool children and from research focusing one particular training group of children.
