Abstract:
The aim of this bachelor thesis is to evaluate the financial situation of the Family Brewery Bernard corp. Financial economy of the company during the years 2007 to 2013 is here analyzed on the basis of the accounting statements of the particular company. With help of the ratio and absolute analysis the strengths and weaknesses of the company were detected. Equally important part of the thesis is the calculation and following interpretation of economic value added and IN 05 index. The final part of the work is comparison within the field of brewing, which is in the form of comparing with the Nymburk Brewery.
