Likutei Amarim and Hasidic Spirituality

Mgr. Markéta Holubová

The aim of my thesis has been to offer to a Czech reader a translation of the fundamental parts of the work, which represents one of the peaks in Hasidic literature (and was unavailable in Czech language up to this time) and to point out profundity and imaginativeness in Zalman's work. I have tried to make the commentary a comprehensive guide to the enclosed text, taking into account religion-historic background in order to show the power and originality of Shneur Zalman's personality and to show the influence his work has had on modern Hasidism.
