

ABSTRACT

English version

Subject: Pharmacy in the Czech lands between 1938/39 and 1945.

Objective: Study of pharmacy in the Czech Lands between 1938 and 1945 and study of the pharmaceutical branches, especially pharmacy practice, pharmaceutical education, pharmaceutical industry and professional organizations during the World War II.

Methods: Processing of the historical pharmaceutical press from Czech pharmaceutical museum in Kuks.

Results: The financial situation of pharmaceutical staff between 1939 and 1945 was increased by pay rise and turnover rise in pharmacy. Short supply of ingredients was equalized by increase in drug production in pharmaceutical industry. University education of pharmacists was stopped by Germans in 1939.

Jewish companies in pharmaceutical industry were impounded by german merchants.

Conclusion: Business in pharmacy during the World War II was successful for pharmacy owners and their employees. Many pharmaceutical problems such as increase in pharmaceutical rates, build up of Pharmaceutical centre and particular unification of professional organizations was resolved.
