Reviewer comments:

References are not in order of appearance in the text (30, 10, 34, 46...).

There are some typing and factual errors in the text and many errors in references which are incompleted, insufficient and without uniform format according to the citation standards:

i.e.: electronic resources are often not valid (Ref No 15, 18) and mostly it is preferred Greek version before available English version of web pages. (Ref. No 26 etc.), Ref. No 51 are not valid (It is with wrong, invalid format PGhttp:// ?), etc.

In bibliographic search like this, the work with the resources and making references has to be more careful: Page No 10: many macroeconomic data used in characteristic are from different year of observation (2005, 2007, 2013,...) and it is not clear from the text (i.e. information about unemployment, etc.)

Missing some schematic chart (graf) about development and statistic connected with changes in providing health care and its financing.

Missing information about methods and materials used in diploma thesis.

Missing discussion with i.e. the evaluation or limitations of work, own opinion, etc.

Questions:

1. Is there any special differences between social protection system in Cyprus and health care system?
2. Can you describe main advantages what would bring e-prescription and e-health in general?

Evaluation of diploma thesis: Very good, to defense: Recommended
