

REPORT OF BACHELOR THESIS

Supervisor's name: Mgr. Agnieszka Dudová, Ph.D.

Student's name: Pyrillos Tryfonas

Title of diploma thesis name:
Case Study of Physiotherapy Treatment of a Patient with the Diagnosis of Total Endoprosthesis of Hip

Goal of thesis:
Case study elaboration at given diagnosis, theoretical review of the problematics.

1. Volume:

* pages of text	73
* literature sources	43
* tables, graphs, appendices	18 tables, 14 figures, 5 appendices

2. Seriousness of topics:

	above average	average	under average
* theoretical knowledges		x	
* input data and their processing		x	
* used methods		x	

3. Criteria of thesis classification

	degree of evaluation			
	excellent	very good	satisfactory	unsatisfactory
degree of aim of work fulfilment	x			
independence of student during process of thesis		x		
logical constutruction of work	x			
<i>Theoretical part deals with anatomy and biomechanics of the hip joint, next student describes osteoarthritis and possibilities of treatment, including non-surgical and surgical care. Physiotherapy care is described for pre- and postoperative state. Special part deals with case study of patient after total hip endoprosthesis surgery.</i>				
work with literature and citations		x		
<i>Student is using a lot of secondary sources (lectures) when original literature is available.</i>				
adequacy of used methods	x			
<i>Methods used in special part are adequate to patients condition</i>				
design of work (text, graphs, tablels)		x		
<i>Few places with typing/text errors and paragraph setting errors.</i>				
stylistic level	x			

4. Usefulness of the thesis outcomes: above average average

5. Comments and questions to answer:

Please describe sensitive innervation of the hip joint (pain sensitive structures).
What kind of physical therapy modalities would your patient benefit from in long term rehabilitation plan?

6. Recommendation for defence: ANO NE

7. Designed classificatory degree: very good

Date: 12.5.2014
