Chateau Zákupy under influence of Ferdinand V

This bachelor's thesis focuses on Ferdinand V. and his reign on chateau Zákupy, which is the main subject of my interest and of this work. Because Ferdinand V. had a major importance in the Zákupy region, I dedicated part of this work to his life and reign. Ferdinand V. was the last crowned Czech king and he chose chateau Zákupy as his major summer residence. As the chateau was supposed to represent his person and status properly, it was rebuilt by significant artists and craftsmen of its time. This work is focusing on the original state of the chateau Zákupy, its reconstruction, equipment and decoration.
