

Bachelor's thesis „Development of sensory systems related with postural-locomotor function in toddler's age, possibilities of assessment“ summarizes function of visual, vestibular and somatosensory system and maturation of these systems in toddler's age. Next part describes the development of postural-locomotor function related to maturation of sensory systems. The last part of the work deals with the issue of assessment in toddler's age. Three toddlers are described in the practical part of the work using the GMFM-88 test.
