

REPORT OF BACHELOR THESIS - opponent

Opponent's name: Mgr. Pavla Kratochvílová

Leadership's name: Mgr. Kateřina Holubová

Student's name: Simen Schei Eikbu

Title of diploma thesis:
Case study of physiotherapy treatment of a patient with the diagnosis total hip replacement

Goal of thesis:
The aim of the thesis in the theoretical part was analysis of general information about the anatomical, biomechanical and kinesiological aspects after total hip replacement. The practical part contain case study of the patient after total hip replacement

1. Volume:

* pages of text	72
* literature	20
* tables, graphs, appendices	Tables 26, Figures 4

	above average	average	under average
* theroretical knowladges	X		
* input data and their processing		X	
* used methods		X	

3. Criteria of thesis classification	evaluation			
	excellent	very good	satisfactory	unsatisfactory
degree of aim of work fulfilment			X	
depth of analysis of thesis			X	
logical consttruction of work				X
work with literature and citations		X		
adequacy of used methods			X	
design of work (text, graphs, tablels)				X
stylistic level			X	

4. Usefulness of the thesis outcomes: under average average

5. Comments and questions to answer:

Mr. Schei Eikbu proved good working knowledge and interest in branch of study during bachelor practice. That is why I was surprised and disappointed by this thesis. There are many mistakes in formal editing of the thesis. But there is also serious mistake, which was maybe caused by misunderstanding - it is not allowed to shift patients weight on a leg after total hip replacement so early. Therefore is not possible to use two scale test. I evaluate this thesis with degree 3. Question 1: Describe contraindicated movements after total hip replacement. Question 2: Describe three-point gait pattern with crutches.

6. Recomendation for defence: YES NO

7. Designed classificatory degree 3
 according defence
