III. Průběh obhajoby

Student introduced his Thesis and results obtained in the experimental work.

Then, the mentor doc.PharmDr. Zdeňka Šklubalová, Ph.D. and the reviewer doc. RNDr. Milan Dittrich, CSc. read their reviews. The student answered the comments and questions.

In discussion, the student answered the other questions:

Which equipment was used for drying of substances?

Could you describe the method of density measurement?

....Was the precision of measurement so high that the standard deviation resulting to zero?

Finally, the committee agreed that the student successfully defended his Thesis.
