

Abstract

Positions of Graduates of the Study Program Health Care Bioanalytics on a Job Market

Author: Jana Mičulková

Study program: Health Care Bioanalytics

Tutor of bachelor thesis: RNDr. Jana Kotlářová, Ph.D.

Department of social and Clinical Pharmacy, Faculty of Pharmacy in Hradec Kralove, Charles University in Prague, Czech Republic

Aim of bachelor thesis: An aim of this study was to get current knowledge about positions of graduates of the study program of Health Care Bioanalytics on a job market. Next aim was to elaborate basic materials including a legislation in area of their professional education and life.

Methods: The fundamental basis of the theoretical part of this study was the legislation of the Czech Republic as amended to 31.5.2014. My survey was realized in years 2012/2013. For creating of this study I utilized results of an online questionnaire designated for graduates of the Study program Health Care Bioanalytics who studied in years 2004 – 2010. The online questionnaire was processed in to charts.

Results: An answer the online questionnaire sent 157 graduates, which is 57 % of all approach graduates. The study shows that graduates are satisfied (with minor reservations) with their situation. The 73% of them think that it was a good choice to start to study Study program Health Care Bioanalytics. In the end of study graduates had have enough of theoretical knowledge but not much of practice.

In theoretical part of this study is summary of legislation of the ČR which is focused on a professional conditioning and work of Health laboratory technicians and Technical staffers in laboratory methods.

Conclusion: Laboratory of the health department is highly specialized workplace which needs high-educated employees like graduates of study program Health Care Bioanalytics which is educated in Charles University in Prague Faculty of pharmacy in Hradec Králové . The survey shows actual findings about position of graduates on a job market and concrete proposal for their better profession preparation.
