

Abstract

The main objective of this bachelor thesis is to try to typologize Czech counterparts corresponding to the phenomenon called substantivized infinitive. Firstly, in the theoretical part, the thesis will be dealing with definitions of related terms, the means of substantivization, the categorization of the types of substantivized infinitives, the syntactical complements which can compose syntagmas with the substantivized infinitives and the function of the phenomenon in the phrase. The practical part will be firstly concerned with comparison of various Czech translations corresponding to one Italian original then it will be focused on comparison of substantivized infinitives with their Czech counterparts based on parallel corpus InterCorp. Subsequently, it will focus on the assessment and commentary of the accomplished results.
