

Abstract

BRAUNOVÁ, L.: František Kožík's biographical novels about Zdenka Braunerová compared to the extant correspondence /Master Degree Thesis/ Prague 2014, Charles University in Prague, Faculty of Education, Departement of the Czech Literature.

This Master Degree Thesis compares Kožík's novels *Na křídle větrného mlýna* and *Neklidné babí léto* with the extant correspondence, which is used in different ways in both novels.

The starting point was extensive research, which provided a precise understanding of the author's intentions.

The goal was to find out how the author forms the characters and their relationship using sources, especially the correspondence. At the same time this thesis delineates the difference between facts and fiction with an example of Kožík's novels.
