

The main focus of the work is to search for the greatest Czech, according to opinion of the 9th grade students. Other goal was to create and apply a project, through which we gathered information. Another goal was to find out if the students are interested in these persons out of the school education. Two methods were used to fulfil these goals – a survey and a project. The results of survey are: 1st place - Charles Fourth, 2nd place - Tomáš Garrigue Masaryk and 3rd place – Václav Havel. The survey also showed that students are in mostly interested in these persons. If they do, they use internet and documentary movies as main sources of information rather than specialised literature. The final reflection of the project indicates that students liked it and considered it as interesting.
