

Title of the Bachelor's Thesis:

Hamburg, a culture city

Abstract:

My bachelor thesis focuses on Hamburg, the second biggest city of Germany, from the cultural point of view. The thesis is based mainly on the studying of the professional literature, some information I also found on the internet. A great help for me were also the interviews with experts, workers from the Czech Republic or Germany, which are to some extent involved in the Hamburg theater scene. They gave me useful advices. Photographic documentation I made during a visit to Hamburg. In my thesis I thoroughly analyzed the cultural scene in Hamburg and I came to the conclusion that the city plays in fields such as literature, media, theatre, music or education a very important and irreplaceable role not only in Germany but also in the whole of northern Europe.

Key words:

History, architecture, religious buildings, university, music, museums, galleries, harbor, theatres, writers, media
