Abstract

This thesis is focused on the structure and development of crime in the single administrative regions of the Czech Republic over the period from year 2000 when these new administrative units were established until year 2012. The main aim of the thesis is to map and describe the structure and development of crime in the different parts of the Czech Republic, the profile of typical offenders and crime typical for the given region and last but not least the detection rate of crime committed in the analyzed areas. The text also explains the key terms such as criminology and crime and its structure and development and presents the main sources of data used for the hereabove described analysis. The difference between latent and registered crime is also discussed therein.
