

Abstract

The aim of the diploma thesis is to define individual types of intellectual property and to describe ways of intellectual property protection in Czech Republic including the relevant institutions and legislation.

The thesis demonstrates how the intellectual property is protected abroad, concerning the national degree of protection in thirty countries (according to OECD selection) and also the international degree. Attention is paid to individual institutions and their objectives and also to their online presentation via institutional websites with the inclusion of the websites' quality ranking.

The patent, industrial design and trademark databases of WIPO and ÚPV (Czech office for intellectual property) are judged according to the ISO 9241 standard.

Keywords

patent offices, industrial property offices, intellectual property, industrial property, information services, databases, Industrial Property Office of the Czech Republic
