

Footnote: In the graduation thesis I focus on the study of activities of KSČ in the district of Ústí nad Labem in period between years 1945 and 1948. The basis of my work comprise study of sources and literature. I concentrate my interest particularly on following thematic fields: organizational activity, personnel administration, activities in trade unions and acting in bodies of local self-government (ONV and MNV Ústí nad Labem). Naturally I touch activities of other political parties with whom Communists clashed when they aimed to reach their goals. The work should globally depict and appraise activities of KSČ in the district and put them into wider context.
