

## **Abstract**

The thesis "Analysis of used Natural history and Biology textbooks in terms of anthropology, the morphology and anatomy of human" is largely empirical work. The aim was to determine the didactic and the difficulty of textbooks which are available in the Czech Republic for the 8th grade of elementary school. The work is complemented with research of using the textbooks in primary schools and lower grammar school in Třebíč. The used methods were 2 analysis, according to the specific criteria and own questionnaire for teachers of the subject. Analysis of textbooks is based on the methodology of Prof. Průcha a Doc. Hrabí.

**Keywords:** textbooks, biology, human biology, equipment, level of difficulty, analysis, Třebíč
