

Abstract

Title: Analysis and significance of selected game activities of individuals without the ball with specialization setter

Objectives: The aim of this work is analysis of selected game activities of individuals without the ball, mainly in offense and to a lesser extent in defence situations. These situations are analysed via selected sequences in the software DartFish. The research was focused on three setter from three currently the best women's teams in the Czech Republic: Pavla Vincourová (VK Agel Prostějov), Iveta Halbichová (PVK Olymp Praha) a Veronika Tinklová (SK UP Olomouc).

Abstrakt: This thesis is dedicated to all volleyball fans and mainly to volleyball coaches who are interested in problematics of move of a setter in volleyball. The thesis contains chapters on the history of volleyball, game performance and its diagnostics, other chapters are on set and setter. The practical part deals with movement of the game of volleyball on the setter position and its issues.
