ABSTRACT:

The theme of this thesis is spirituality of the marijuana users. The first part of the thesis focuses on the problematic of definition of spirituality. Furthermore, spirituality is put in historical and cultural context of use of psychotropic substances and finally in context of actual researches and approaches. The goal of the research part is to determine whether spirituality of marijuana users is the same or different from spirituality of the population without drug experience and what other factors related with drug using can contribute to formation of spirituality of the marijuana users and thus to contribute to greater understanding of the marijuana users or eventually other drug users. The research is carried out with the help of Prague spirituality questionnaire.
