Mentor comments to thesis and student approach:

Student prepared an useful diploma thesis with some interesting information on the health care system and about the system of pharmacies in Greece. There are mainly only e-prescriptions which are used in Greece nowadays and this can serve as good inspiration for the Czech republic now. Georgios was working on his diploma thesis whole time relatively independently and with elation but results are not corresponding with this. I was on average satisfied with his work.

Evaluation of diploma thesis: good, to defense: recommended
