Abstract

In its theoretical part this bachelor thesis deals with the definition of leisure time and presents the most prestigious leisure institutions and organizations in the Czech Republic. It especially focuses on the specifics of leisure time of hearing-impaired children and youth. It briefly describes the range of leisure activities that are available at schools and hearing loss organization in several cities. In the practical part the questionnaire and survey data are analysed. Attention has also been paid to the difference between leisure time of surveyed boarding and non-boarding pupils.
