

This dissertation focuses on development of reading skills in teaching Czech language on the first grade of elementary schools with application of motivation effect of modern technologies. The thesis focuses mainly on usage of tablets as the latest technology, which currently begins to be used in classes of the elementary schools. In the theoretical part, I apply terms such as reading skill, reading literacy, motivation, and motivate activities. I present methods for teaching reading and describe individual modern technologies that are used in teaching. The goal of this dissertation is to show by what manners may be the tablets applied in the teaching. One section of the practical part is a collection of applications that can be used for development of reading skills. Furthermore, I introduce how the work looks in a class with the tablets by description of sample lessons and I compare it with the work which does not use the modern technologies. I also add opinions and experience of students and teachers who are already working with tablets in classes.
