

Abstract

KLETEČKOVÁ, D. *Anonymous child abandonment in the Czech Republic*. Prague: Faculty of Arts of Charles University in Prague, 2014. 131 s. Diploma thesis.

In the theoretical part the student aims to map the situation of leaving children anonymously in the Czech Republic in comparison with selected countries in Europe, the history of this phenomenon, the current situation and possible insights into the future. Anonymous leaving of children is studied from several perspectives, in terms of legal, psychological, medical and mainly social point of view.

In the empirical part the method of inquiry, namely the interview technique is used. For this purpose experts on the specific areas were interviewed - lawyers, psychologists, doctors and social workers. In the conclusion part the research data are evaluated and possible measures suggested.

Key words

Anonymous abandonment, secret delivery, babybox, family, child
