

Proposal of the map atlas for extreme whitewater canoeing

Abstract

Topic of the bachelor's thesis is creation of thematic maps and also creation of map's atlas for extreme canoeing. The first step was creation of river's maps appropriate for canoeing. The second step was creation of character key for this application. The next step was a concept for the atlas. I have choosed most appropriate score to creation of river's maps. The next part of the bachelor's thesis is about two questionnaires for needed data. An area was choosed to creation of maps. A data and a design rules you can find in the practical part. You can see detail for the creation of maps and character key. The bachelor's thesis is about concept of maps and about key for this one and also creation of the atlas to print. You can see also a proposal for this atlas.

Key words: thematic map, score of maps, blanks, extreme canoeing, creation of maps
