

Žemlová, M.: *Reality and dream*. [Diploma thesis] Prague 2016 – Charles University in Prague, Faculty of Education, Art Education Department, p. 91, (annexes: two pieces of own art work)

The subject of this thesis is an individual concept of the main theme – reality and dream. The author sees this theme through her own intensive experience, connecting it with the pedagogical practice and fine art. The thesis is divided into three parts, where the first, theoretical, discusses imaging of themes connected with a woman and motherhood, offering a parallel of the traditional male view and female concept of the present. The didactic part brings a search for the ideal way – dream – in an environment hostile to art education at private vocational school. The practical part presents the author's own art work reflecting her personal experience with motherhood.

Key words: Reality, dream, art, mother, motherhood, parenthood, feminism, pedagogical practice
