

## **Abstract**

**Bc. Jiří Vlasák, Deanery of Prácheň in the Late Middle Ages**, Diploma Thesis, Charles University in Prague, Faculty of Arts, 2015

This thesis deals with the church administration of the Prácheň's deanery, chiefly within the Late Middle Ages. It focuses on individual parishes in terms of their patronates, assets background, territorial scope of authority and parish clergy. Moreover, it deals with other types of benefactions of the deanery, yet attention is dedicated to the deanery as a whole, too. Chief historical resources used were official records of the Archdiocese of Prague, primarily books of confirmation and books of erection, and the records of the Prague's consistory.

Key words:

church administration, Prácheň's deanery, 14th and 15th century, clergy, assets background, territorial scope
