ABSTRACT

Aim of the thesis

The aim of this study is to gain insight and information about teaching of games on the 2nd grade of elementary schools in Ústí region and in Prague.

Methods used

To solve this problem, I used a questionnaire that I sent to teachers of physical education in elementary schools. Through questionnaires, I found some differences in the approach to teaching sports games.

Results

The results of this study can serve as a basis for more extensive research. My results are in tables at the end of the work.

Key words: sports games, physical education, elementary school
