

Introduced bachelor thesis focuses on significant figure of special pedagogy Prof. PaedDr. František Kábel, DrSc. The thesis follows up his life as well as his influence on formation of the special pedagogy in our country. It concentrates on Kábel's progressive ideas and actions leading to growth of speech therapy and somatopedie. Nowadays many of those thoughts are still valid and relevant. This work looks also at Kábel's share on foundation of some of the institutions dedicated to care of the disabled and selection of his rich publications. The thesis has theoretical character, it was compiled mono-graphically with use of professional literature, publication and other sources.
