

Internal migration of Vietnamese in Czechia and its regularities

Abstract:

The purpose of this diploma thesis is to identify the key factors in the spatial distribution of the Vietnamese, characterize trends of their internal mobility in the Czech Republic and in two regions – Karlovarský and Ústecký. These both regions are characterized by a high concentration of Vietnamese in the Czech Republic. The thesis uses a questionnaire survey among Vietnamese migrants which took place on whole territory of the Czech Republic in 2013. Therefore we can describe their reasons for coming to our republic, trends in internal mobility and future migration plans. Part of the thesis is focused on relationship between the migration of Vietnamese and their employment or accommodation.

Keywords: international migration, internal migration, immigrants, Vietnamese, spatial distribution of immigrants, Karlovarský region, Ústecký region, questionnaire survey
