

## **Abstract**

**The name of work:** Forehand analysis of elite tennis players on a grass surface

**The aim:** The aim of this work was to determine the frequency, efficiency and success forehand elite players selected matches at Wimbledon 2016. It was the 8 matches, where I watched for each player 50 games, of which I subsequently processed results in tables and graphs detailing found out the frequency, efficiency and success forehand.

**Method:** The analysis was performed using indirect structured observations based on stored live coverage of Wimbledon 2016. It was used investigation with using line method in folios.

**Results:** The results show us that the player is often used forehand, with whom were successful and in whom effective.

**Key words:** forehand, frequency, efficiency, success
