

Abstract

The main aim of the master thesis is an evaluation of archaeological textiles from the site Na Rejdišti 1 - Praha 1, which are coming from the rubbish dump. They are dated from the 16th to the 18th century. Key sources of information are analogical situations coming mainly from Poland and Germany where the textile fragments have been evaluated from rubbish dumps, water wells, cesspits and sewers. Outcome of the paper is also a tabular catalogue of findings.
