

Summary

This bachelor thesis is divided into parts, specifically theoretical and practical part. Theme is adolescents and their relationship to the authorities. To understand such relationship you need to know psychic development at this developmental stage. First sections of theoretical part are about this psychic development. Separate part is about authority and its development.

Practical part tries to establish what does authority mean to adolescents. Main question is what must person with authority do, how to act and how to interact with students. Major part of answers was as expected but some answers are surprising and new

The results could be instructions for teachers to know what students want and expect.
