

# Vliv psa na zdraví dítěte

Lucie Opatrná

## Abstrakt v AJ

This work describes influence of pet dog on child's overall health. Further there is discussed choice of a proper family dog, prevention against injuries caused by the dog and prevention of diseases the pet can transmit.

The goal of this work is to determine from a questionnaire, whether a dog has positive impact on child health and what is the awareness of children in the area of communication with a dog. Next, there is proposal of a hobby group, that aims on cooperation of a child and dog.
