

Abstract

- Title:** Performance indicators comparison of selected Czech and German women's team
- Objectives:** The aim of the thesis is to compare game performance indicators for the women's basketball teams in different European leagues. The minor goal of the thesis is to compare performance indicators in play-off games.
- Methods:** The main method is direct registered observation using the „basketball scoring sheets". We analyzed sheets and then we compared the achieved values
- Results:** Based on our study we found the values of the game performance indicators at the observed teams occur different regularly as well as irregularly.
- Keywords:** team game performance, indicators, shooting success, comparison, individual game activities
