

ABSTRACT:

This bachelor thesis focuses on the analysis of the career of a woman with mild mental disabilities who is a client of a reception centre for mothers with children. The theoretical part is dedicated to the needs and specificities of persons with mild mental disabilities. It describes a stay service of social prevention – a reception centre for mothers with children. The work also discusses the possibilities of school education of persons with mild mental retardation.

The practical part deals with the case history of a woman with mild mental disabilities who is staying in a reception centre for mothers with children.
