Abstract

The bachelor’s thesis Czech of Slovak Speakers analyzes the spoken language speeches by two Slovak speakers in the Czech language on the basis of language transfer, semicommunication and linguistic typology of errors described in the first part. The second part is in relation to the theoretical definition of the problem devoted to the research. It describes and according to the language levels divides errors as actually found in the speeches and imagined, which are described by speakers themselves. The conclusion find out the ratio between the errors caused by interference and by other influences. We explain possible causes of this situation and we are suggesting a solution there.
