

Abstract - Multiculturalism from the Perspective of the Czech Extreme Right

The bachelor's thesis entitled "Multiculturalism from the Perspective of the Czech Extreme Right" explores how the term of multiculturalism is viewed and presented by the selected Czech extreme-right parties and initiatives, in particular Dělnická strana sociální spravedlnosti (Workers' Party of Social Justice), Národní strana (National Party) and Akce D.O.S.T. (D.O.S.T. Action). The thesis contains three main chapters. The first chapter presents individual concepts of multiculturalism. The second chapter focuses on the Czech extreme right scene and also on the process of selecting the parties and initiatives for this study. The last chapter presents specific views of multiculturalism by the selected parties and initiatives. The main goal of this thesis is to test the hypothesis: Is the view of multiculturalism by the Czech extreme right parties and initiatives negative?
