

The purpose of this project is to put forward geology - botanical excursion in environs of Svatka. The pupils of primary and secondary school can meet botany and geology of this area.

In the first part of this project I describe the area of Žďárské vrchy in botanical, zoological and geological point of view.

In the second part I make attention on excursion in environs of Svatka. I chose ten areas and arranged them in six excursions.

For each excursion belong the basic informations, description of area and working list. Excursions are specified for primary and secondary school. The project include photos of rocks and flora of this area.
