

Abstract

In this work I would like to focus on language culture and incorporation of words from foreign languages into Czech language in *Právo* in 1990 – 2014. In the first part of the analysis I would like to look closer on the language culture in *Právo* by comparing language culture in the years 1990 and 2014. This gives me overview of the language evolution. For more accurate analysis of the language culture I will go through every year of the newspaper. In the second part of the analysis I would like to focus on the incorporation of foreign words into Czech language in *Právo*. I will be analysing the same period as in the previous section. I selected this period on purpose because I think that after 1989 there will be more and more foreign words coming into Czech language. I also suppose that the number of incorporated words will stop rising and keep at some level after some time. I would like to focus on the number of incorporated words and what foreign languages are used for the incorporation the most.
