ABSTRACT:

The content of my thesis is a summary of all so far discovered sacral buildings in the territory of the royal town Znojmo, that have not been preserved, but that were destroyed or rebuilt. Gradually there are described defunct the Great Moravian buildings, the medieval and the modern buildings. A special part is the chapter of defunct sacral buildings of the cemetery. Defunct sacral buildings in Znojmo were studied from the perspective of historical, architectural and from the viewpoint of current status and utilization. Personal contribution to this work is a restoration viewpoint and pointing out options to improve the situation.

To study were used the primary sources from the archival collections in Znojmo, Czech and German regional literature, files of contemporary periodicals, postcard of the secondary modern literature. The possibility of consultations with local historians and a personal visitation of all described sites for creating custom preview and photos were used as well.

This thesis is not the first register of defunct sacral buildings in Znojmo, however is the first complete register, which is focused directly on this topic.
