

## **Abstract**

The bachelor thesis consists of two main parts. The first part contains a Czech translation of selected chapters from a booklet *Berlin deutsch-türkisch: Einblicke in die neue Vielfalt* by Dr Martin Greve and published in 2008 by The Berlin Senate Commissioner for Integration and Migration. The second part is dedicated to an analysis of the source text, mainly based on Christiane Nord's model, as well as to the presentation of the translation method, the typology of translation problems and their concrete solutions.
