

## **Abstract**

Bachelor's thesis is divided into two parts when the first part is theoretical and is dedicated to the history of Uherskobrodských Jews and their lives in Uherský Brod during the First Republic. In this part I prefer to focus on their lives during the 30s of the 20th century and the changes, which the year 1939 brought upon them thanks to the regime. The second part is practical and is focused on the life story of Jew Willy Block, who survived the nightmares of the Second World War in concentration camps and he is one of the witnesses of the Holocaust.
