

# **Institutional care of the elderly in the district of Ústí nad Labem in the context of current and future population development**

## **Abstract**

The aim of this thesis is to describe the situation of the institutional care of the elderly in the district of Ústí nad Labem. The text consists of several parts. First part is an analysis of chosen components of population development between 1991 and 2013. Second part is a forecast of population at age 65 and older. The forecast is the root for estimation of capacity facilities with care of elderly in the district. Next part is a description of the legislative framework based on the social services act from 2006. This thesis also provides overview of plans and goals targeted on the social services of the Ústi county and the city Ústí nad Labem. At the end there is an assessment of capacity of facilities with care of elderly based on previous findings.
