

## **Annotation**

Diploma thesis Philosophy in the work of John Amos Comenius is focused on demarcation main points in the work of John Amos Comenius, great thinker, philosopher, pedagogic and theologic authority.

I deal with philosophy and with influences of most important people, atmosphere of 17th century, significant finding and inventions and his live on his work.

Comenius was great thinker of education and pedagogue in praxis and methodology. This is another part of my work, I focused on education in praxis and of course his work in books.

I mention ODO - *Opera didactica omnia*, huge work of pedagogic methodology and *Obecná porada o nápravě věcí lidských* - his masterpiece. This work have to unify his work in one big complex. Than I am trying to compare it with our today reality and find similar problems in our school and education proces.
