disease, patient

Summary:

This bachelor's thesis represents Christian faith in terms of social support. It is showing it's influence in human's life and tries to emphasize it's importance. In theoretical part basic concepts are characterized. These relate to faith and social support and describe relationships between them and human beings. In the empirical part of thesis, the experiences of people which accompanied their loved one's during their illness and dying are compared. Their statements describe what kind of role played Christian faith in their life and how it helped them in difficult life situation.
