

## **Abstract**

Bachelor thesis of *Religious education of preschool children* is divided into four parts. The first chapter defines the participant of this education, focuses on religious education from the perspective of religious documents and its Division into three components (religious education in the family, the school and the Church). The second part discusses the different methods, methodologies and other didactic material, including persons with katechety preschool children works. Part of the work is a survey of the Catholic families and Church kindergartens, which is evaluated in the third chapter. The last part consists of a summary of the theoretical possibilities, practical implementation of specific recommendations for the design and upgrade of religious education for preschool children. The aim of the thesis is to point out the options that today's parents and educators in this area, and how to use them, or why not. And overall, how is the theory connected with the practice of what is lacking in practice.
