

## **Abstract**

The theme of the thesis is The activities of a pedagogical worker with clients of an asylum house. The target is to find out what activities the pedagogical worker does in this kind of facility, what is the work description, how the worker works with clients and their children. Further more the thesis deals with necessity of pedagogical worker in an asylum house a their in/sufficient capacity. The thesis is focused on finding out the success of a pedagogical worker in this kind of facility and how the pedagogue reaches the target of their activity. In the theoretical part there I describe particular activities which the pedagogical worker carries out in an asylum house, it means in socially disadvantaged environment. In the empirical part of the thesis there I research whether the pedagogical worker is necessary in this facility and wheteher and to what extent their work capacity is sufficient. The research includes finding out the success of a pedagogical worker in asylum house primarily with the help of reached targets made by clients.

Key words: pedagogical worker, asylum house, a client, children, socially disadvantaged environment, education
